**Re: Capital Area Transportation Authority – Emergency Backup Generator  
Matrix Project No: 11195.01**

Paul,

Please include the following in the next addendum.

1. **Drawing E7.2, Option #1 600KW Generator:** Base bid generator does not require a sub panel. If a sub panel is provided, contractor is responsible for changing of the conduits for a new panel feeder and not provided branch circuits for the heater and the battery charger.
2. **Drawing E9.0, Panel “DP2”:** The circuit described as “pump” is a branch circuit to LP pump provided under separate contract.
3. **Drawing E10.0, Option #2 600KW Generator:**
  - a. Generator shall be provided with a sub panel as specified. Panel shall feed generator heater, battery charger, receptacle at site, and day tank pump.
  - b. Contractor is responsible for conduit from transfer switch to generator pad. Conduit from pad to generator is under separate contract. Contractor is responsible for all wire from transfer switch to generator, connecting, and testing.
  - c. Contractor is responsible for providing pump for day tank per manufacturer recommendations.

Sincerely,

Angela Robinson, P.E.  
Matrix Consulting Engineers, Inc.
